Group 10-Phase 4 Report

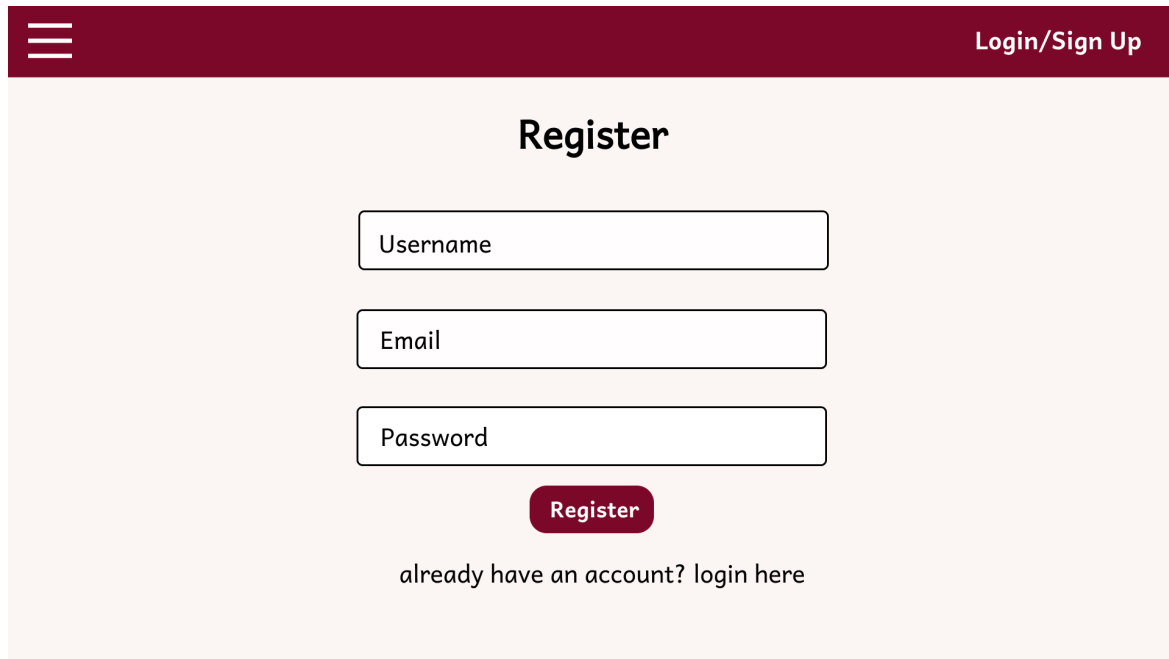

1. UI Screenshots and Description

Landing Page:

The landing page offers information to the prospective user about what features our app can provide and problems that it can solve. We made it simple and one page in order for the user to easily identify our app's purpose, which is supplying an organizational and collaborative tool for family assistance.

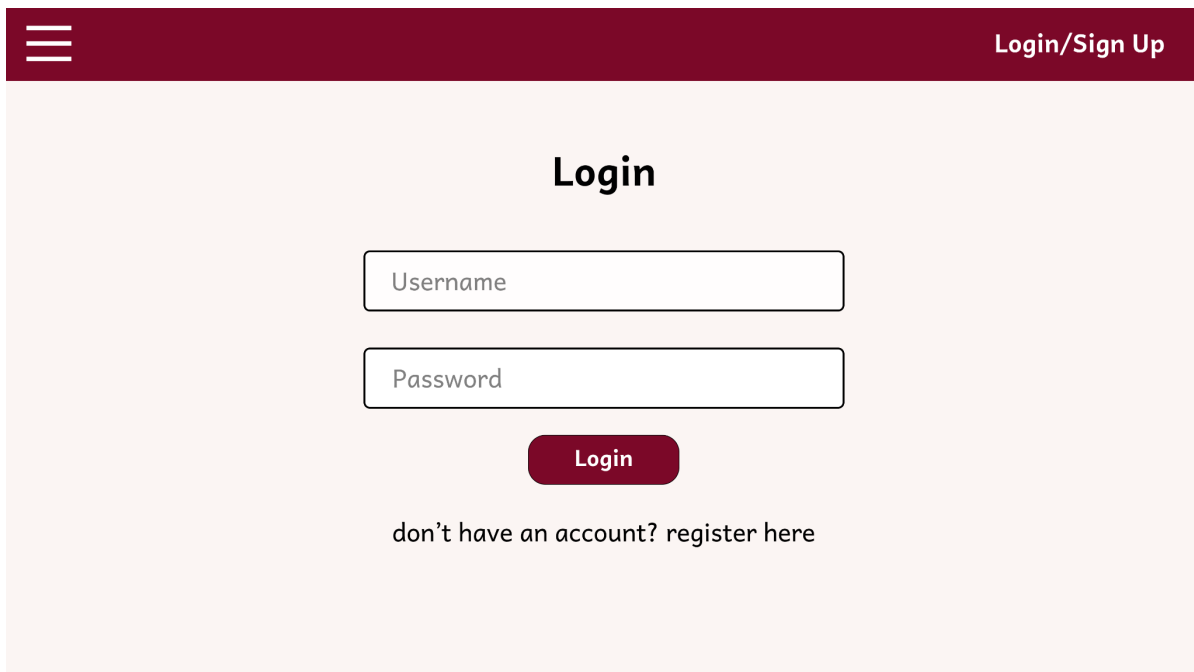

Registration Page:

The registration page features a dark red header with a hamburger menu icon on the left and the text "Login/Sign Up" on the right. The main content area has a light pink background and is titled "Register" in bold black text. Below the title are three white input fields with rounded corners, labeled "Username", "Email", and "Password" in a light gray font. A dark red "Register" button is centered below the fields. At the bottom, the text "already have an account? login here" is displayed in a light gray font.

The registration page is where the user is able to register with a username and password to access the program.

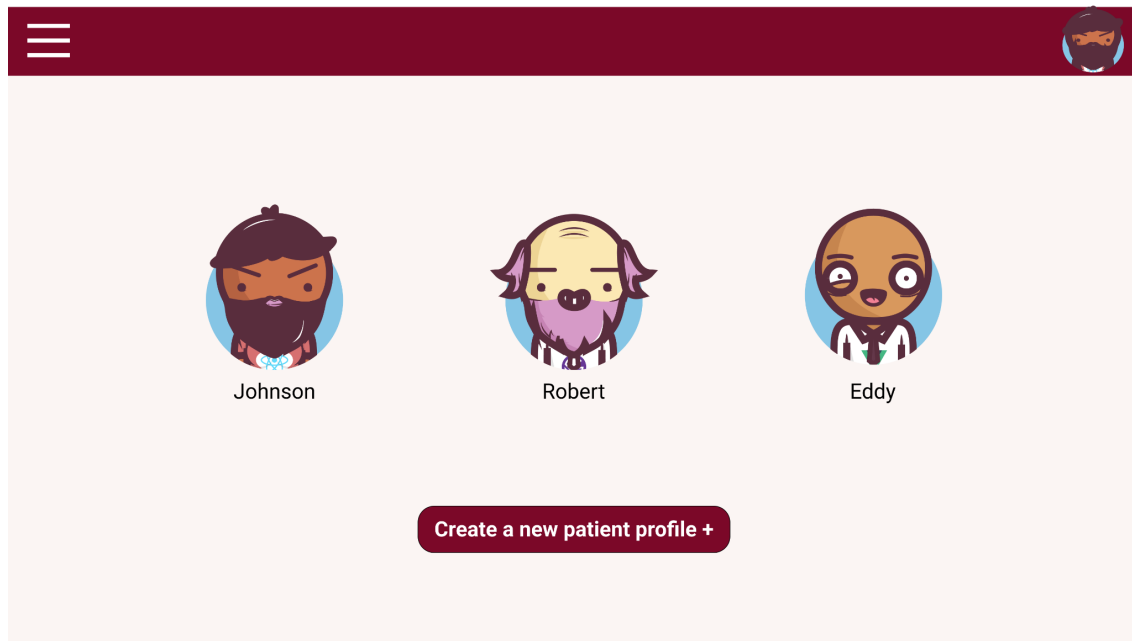

Login page:

The login page features a dark red header with a hamburger menu icon on the left and the text "Login/Sign Up" on the right. The main content area has a light pink background and is titled "Login" in bold black text. Below the title are two white input fields with rounded corners, labeled "Username" and "Password" in a light gray font. A dark red "Login" button is centered below the fields. At the bottom, the text "don't have an account? register here" is displayed in a light gray font.

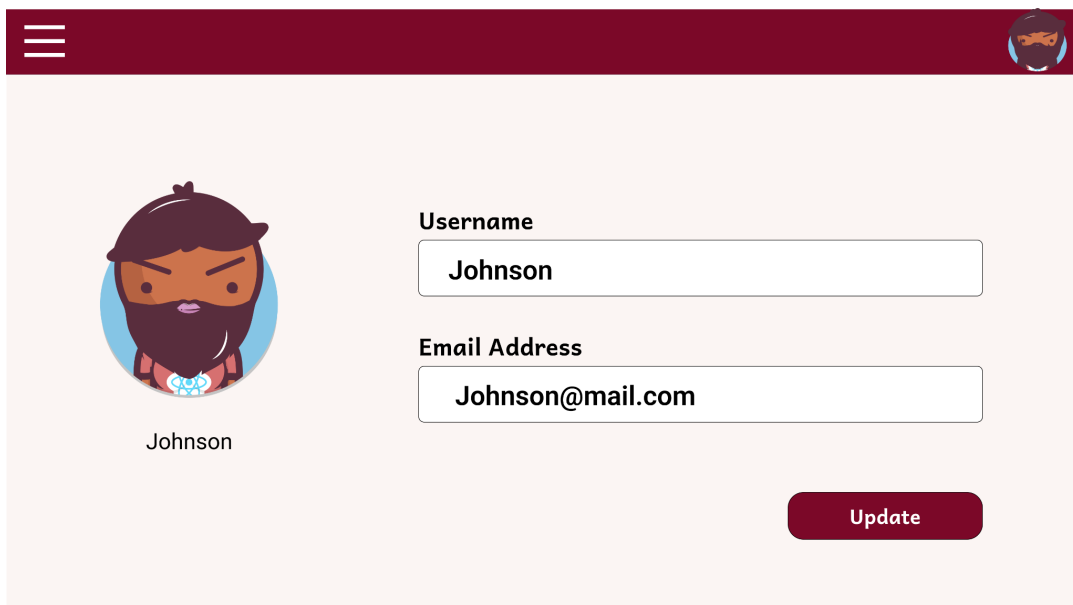

The login page is where returning users are able to login with their username and password. If the user has not signed up yet, they can click the register button to be sent to the registration page.

Patient Profiles Page:

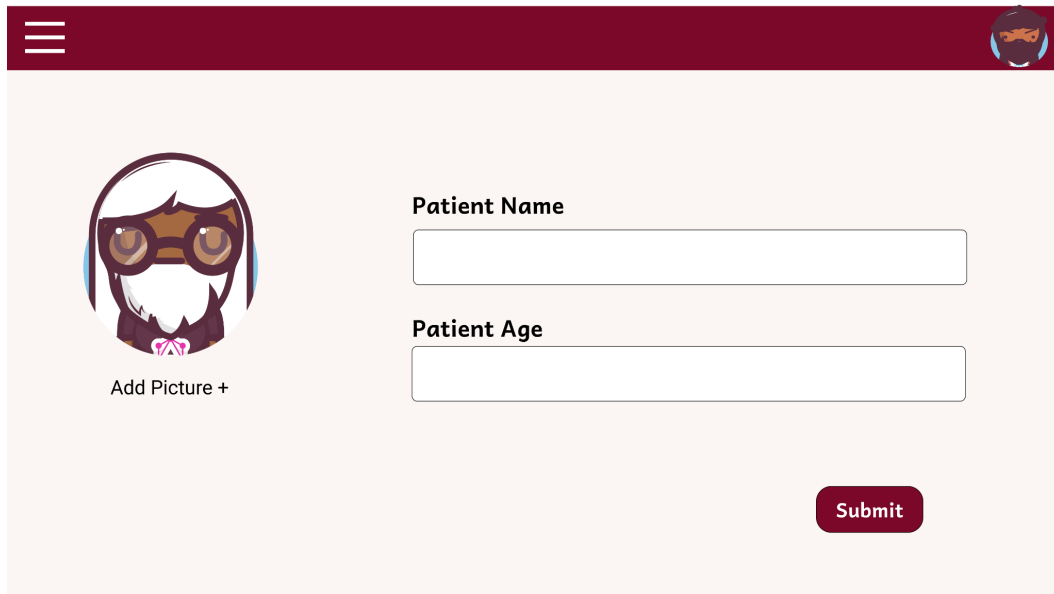

The patient profiles are meant to store content for that specific person, such as a to-do list for the appointments or tasks they need help with and important information about their conditions, allergies, and medications. Users who are collaborating on the list can also view completed appointments, task history, and calendar.

Personal Profile Page:

The personal profile page is meant to be for the user of the account. It allows the user to change their username or update their email address.

Create New Patient Profile Page:

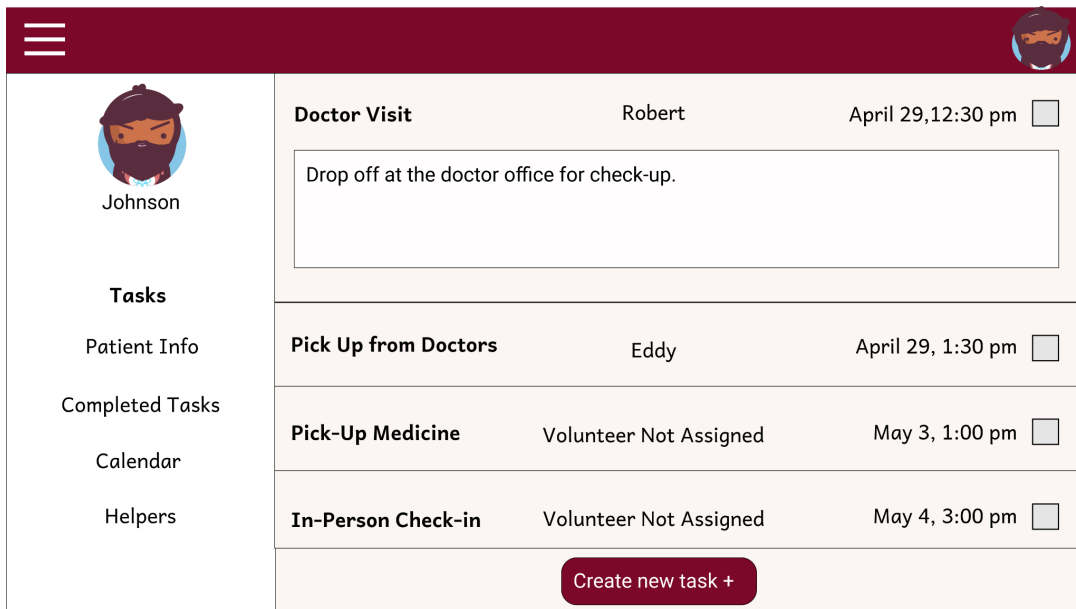

The screenshot shows a web interface for creating a new patient profile. It features a dark red header with a hamburger menu icon on the left and a profile picture icon on the right. The main content area has a light pink background. On the left, there is a circular profile picture placeholder with a cartoon character and the text "Add Picture +". To the right, there are two input fields: "Patient Name" and "Patient Age". At the bottom right, there is a dark red "Submit" button.

 Add Picture +	Patient Name <input type="text"/>
	Patient Age <input type="text"/>
Submit	

This page allows the user to create a new profile for the person they want to assist.

Task View:

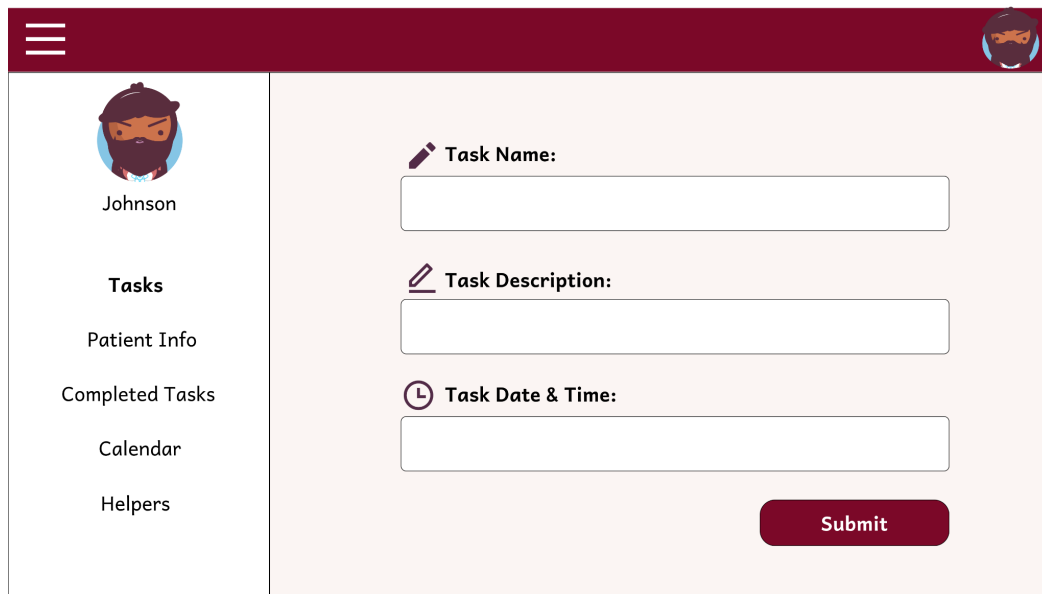

The screenshot shows a web interface for viewing tasks. It features a dark red header with a hamburger menu icon on the left and a profile picture icon on the right. The main content area has a light pink background. On the left, there is a sidebar with a profile picture placeholder and the name "Johnson". Below the profile picture, there are links for "Tasks", "Patient Info", "Completed Tasks", "Calendar", and "Helpers". The main content area displays a list of tasks. Each task row includes the task name, the volunteer name, the date and time, and a checkbox. The tasks are: "Doctor Visit" by Robert on April 29, 12:30 pm; "Pick Up from Doctors" by Eddy on April 29, 1:30 pm; "Pick-Up Medicine" by Volunteer Not Assigned on May 3, 1:00 pm; and "In-Person Check-in" by Volunteer Not Assigned on May 4, 3:00 pm. At the bottom, there is a dark red button labeled "Create new task +".

 Johnson Tasks Patient Info Completed Tasks Calendar Helpers	Doctor Visit	Robert	April 29, 12:30 pm	<input type="checkbox"/>
	Drop off at the doctor office for check-up.			
	Pick Up from Doctors	Eddy	April 29, 1:30 pm	<input type="checkbox"/>
	Pick-Up Medicine	Volunteer Not Assigned	May 3, 1:00 pm	<input type="checkbox"/>
	In-Person Check-in	Volunteer Not Assigned	May 4, 3:00 pm	<input type="checkbox"/>
Create new task +				

This page shows the patient's tasks that need to be done, the volunteer who is going to do the task (if there is no volunteer for the task it will show that there is no volunteer), and the date the task needs to be done, and any details of the task when the user clicks on the task. Also, this page allows the user to select other subpages of the patient: tasks, patient info, completed tasks, calendar, and adding helpers. The last thing this page has is allowing the user to add a new task. Here we can see an example of a task where the task details are filled out along with the task name, volunteer name, and date.

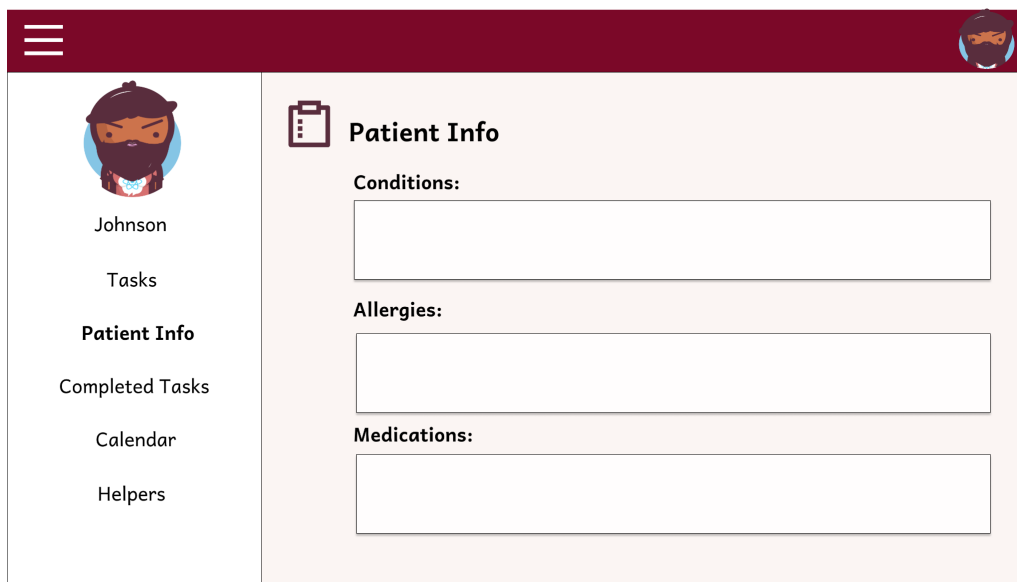

Create Task View:

The 'Create Task View' interface features a dark red header with a hamburger menu icon on the left and a user profile icon on the right. A left sidebar contains a user profile for 'Johnson' and a list of navigation options: 'Tasks' (highlighted), 'Patient Info', 'Completed Tasks', 'Calendar', and 'Helpers'. The main content area is light pink and contains three form fields: 'Task Name:' with a pencil icon, 'Task Description:' with a pencil icon, and 'Task Date & Time:' with a clock icon. A dark red 'Submit' button is located at the bottom right of the main area.

When creating a new task the user will be able to add information about this new task such as specifying the date it will need to be accomplished, the task name, and the description. The new task will then be added to the Tasks tab, and users can volunteer for tasks there.

Patient Info:

The 'Patient Info' interface features a dark red header with a hamburger menu icon on the left and a user profile icon on the right. A left sidebar contains a user profile for 'Johnson' and a list of navigation options: 'Tasks', 'Patient Info' (highlighted), 'Completed Tasks', 'Calendar', and 'Helpers'. The main content area is light pink and contains three form fields: 'Conditions:', 'Allergies:', and 'Medications:', each preceded by a clipboard icon. The 'Medications:' field is the largest of the three.

The patient info tab will include all the necessary information about the patient such as any conditions they may have, allergies, current prescriptions, and in addition any medical information. The helpers will be able to quickly obtain this information whenever they may be in need of it. This also helps the user with any upcoming tasks they may have with the patient.
